DANNY BRAY
FRONT-END DEVELOPER
www.dannybray.com

Profile

Very keen front-end web developer and designer both inside and outside of the work environment. Always strive to further personal knowledge and understanding of subject matter, and a passion of keeping up to date with latest trends and technologies. Enjoy sporting and leisure activities such as football and basketball. The ideal role for me would be Frontend Development with a little bit of freedom to be able to have a say in the design/create mockups.

Featured Skills

Languages/Frameworks: HTML 5, CSS 3, jQuery, Vue 3, AngularJS, KnockoutJS, Interface Design

Tools: Git, JIRA, Photoshop, Sketch, Adobe XD, Firebase, Server-less Applications

Employment & Experience

UX/Front-End Developer, Prezzybox.com/GiftUniverse

Atherstone, 2020-2023

- UX designer and Front-end developer on full-stack application with a AngularJS/ Vue 3 front-end and ASP.NET back-end.
- Undertook partial re-platform of the site from AngularJS to Vue 3 in order to leverage more modern optimisation capabilities to improve site speed and SEO rankings.
- Designed and updated existing feature designs to help make site more user friendly and more visibly appealing.
- Created a Vue 3 application that had to work alongside existing AngularJS pages on the site
- Created design mockups for in house application called MyQdos, a workplace rewards platform.
- Performed A/B testing on new changes to ensure new features/designs resulted in equal or higher customer throughput/engagement.

Front-end Developer, Webmoco Ltd

Royal Leamington Spa, 2014-2020

- Front-end developer and interface designer on full-stack application with a Javascript front-end and ASP.NET back-end.
- Helped design and build Server-less customer feedback web application with Google Firestore currently in use at Birmingham Airport.
- Designed and created cross-platform mobile applications using both Xamarin and Xamarin.Forms whilst adhering to client expectation and brand guidelines.
- Created an Angular application that had to function seamlessly with existing pages. Enabled pages and areas of web application to be rewritten incrementally in Angular.
- Worked alongside product owner to design new areas of product interface before developing in Angular and Xamarin.Forms.
- Liaised directly with clients to understand expectations and help solve problems.
- Redesigned and built the company and product websites - webmoco.com, realtimeknowledge.com.

Front-end Web Developer, Zonica Mobile

London, 2011 - 2012

Had the pleasure of working as a front-end developer for thirteen months for Zonica Mobile, a start-up company. Working for the most part with HTML, CSS and jQuery, the role also entailed some iOS application and website design work using Adobe Photoshop and Adobe Fireworks. The position lead to the acquisition of project management skills as well as improving knowledge of Responsive Web Design using frameworks such as Foundation and Bootstrap.

Freelance Developer & Designer

2006 - Present

Design and build websites in my own time, mainly for personal use but also for a charity (national autistic society).

Alan Dick

Cheltenham, 2006

Worked in Alan Dick (Communications Infrastructure Solutions) as part of a team of 6 in a computing environment requiring a good level of leadership, communication and time management skills. A technical ability to build and assemble computers and server racks was also required.

Education

2:1 BSc (Hons) Web Applications Development

The University of Plymouth, 2009 - 2013

Modules Included: Database Development, Web Site Development, Software Engineering, Computer Systems and Production for Art & Technology etc. A full list of modules and results can be provided if desired.

Gloucester College

Gloucestershire, 2007-2009

Completed 2 year course in Web Development and received a BTEC National Diploma (Distinction - Distinction - Merit).

Pittville Secondary School

Gloucestershire, 2002-2007

English Language(B), English Literature(C), IT(C), Maths(D), Science(D), Science(D)
